

# AS9100 Rev C Upgrade with AS9101D Audit Prep

a two-day seminar presented by:

Fulcrum Associates, LLC

Air Washington

This May 8-9<sup>th</sup> seminar is packed with all the information you will need to upgrade your QMS to meet the Rev C changes and prepare for the impact of the new auditing process.

*In addition, you will walk away with a CD containing Fulcrum's Risk Management Module with all of the tools you will need to develop your Risk Management Program or verify the acceptability of your existing Program.*

With only two months left to upgrade to Rev C, the focus of this training will be adjusted to prepare your company for the new auditing process (AS9101D).

We will review all of the changes to the AS9100 standard and discuss how these changes will impact your existing QMS. A matrix showing how the standard changed and what impact these changes have on the requirements will be used to conduct a comprehensive review of all additions, deletions, and changes.

Because the most significant change to the standard is the addition of the requirement to ensure that an effective Risk Management Program is in place, Fulcrum's Risk Management Module will be used to show how to develop an effective Program or verify the acceptability of your existing Program. The development of the Risk Management Module was based on "ISO 31000 Risk Management – Principles and Guidelines on Implementation".

The second day of this seminar will focus on how to plan and prepare for an effective audit based on the new AS9101D auditing standard. Participants will learn the importance of preparing for this entirely new auditing process and how to help the auditor successfully complete all of the newly required reports. This audit preparation will help ensure a much more effective audit outcome.
